Churned vs Retained Customers

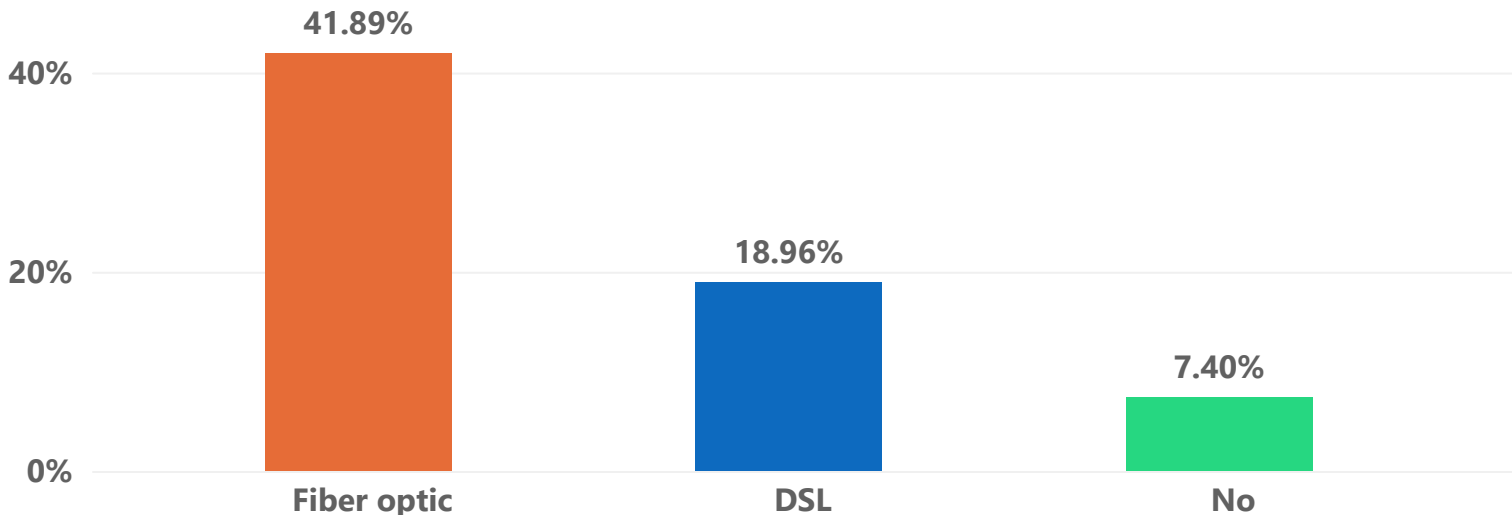

Churn Rate vs Contract

Churn Rate vs Tenure

Churn Rate vs Internet Service

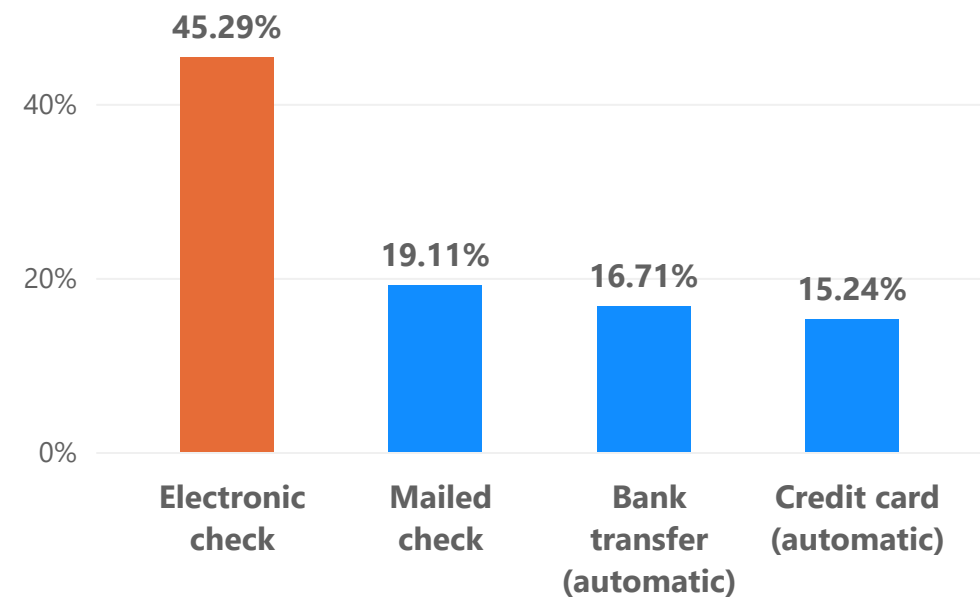

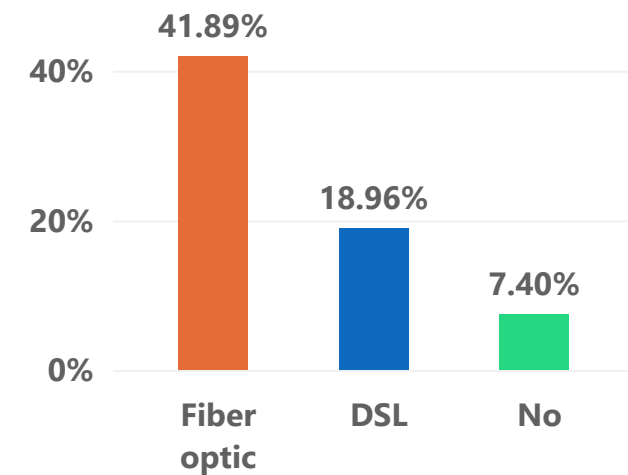

Churn Drivers

What customer characteristics and services are most strongly associated with churn?

Churn Rate by Payment Method

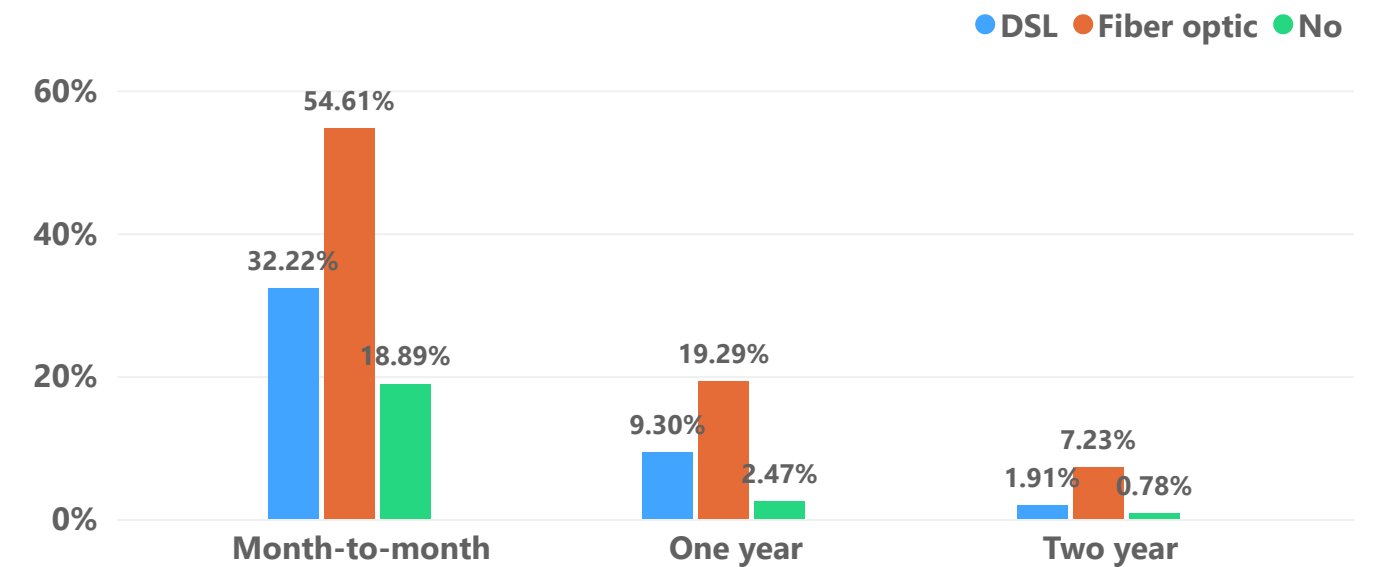

Churn Rate by Internet Service

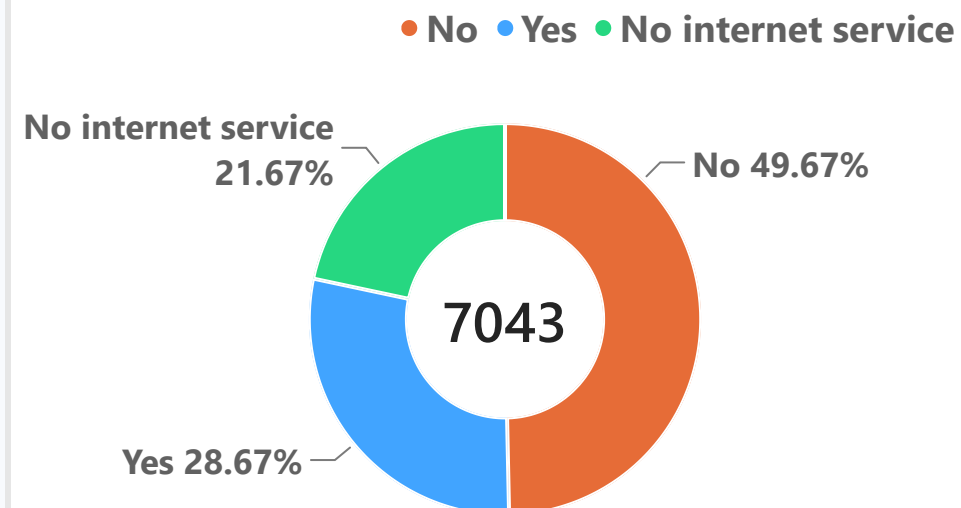

Key Takeaway

Month-to-month contracts, Fiber optic internet and Electronic check payments show the highest churn rates.

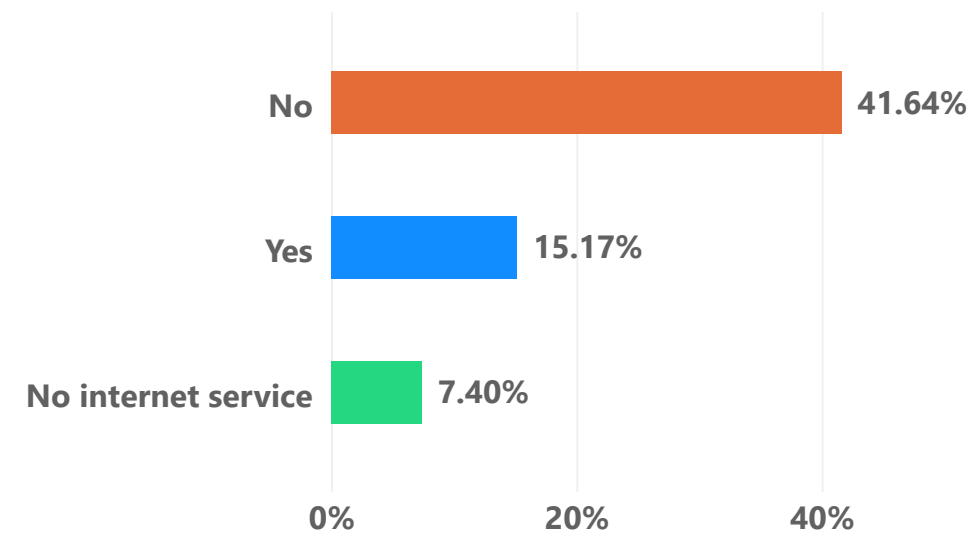

Churn Rate by Contract + Internet Service

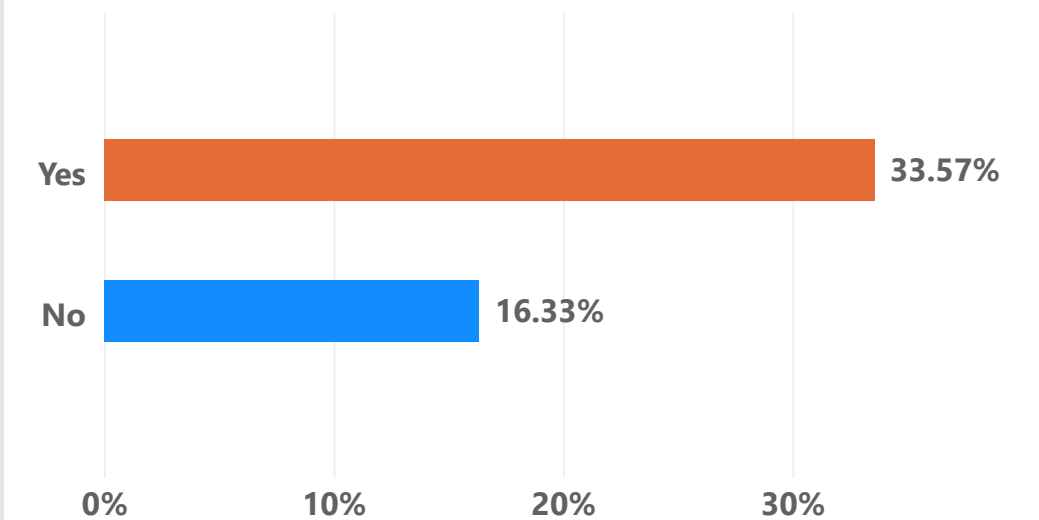

Customer Distribution by Online Security

Churn Rate by Tech Support

Churn Rate by Paperless Billing

Key Insights

1. Contract Risk

Month-to-month customers have a **42.71% churn rate**, compared with only **2.83%** for two-year contracts.

2. Service & Payment Risk

Fiber optic customers (41.89%) and **Electronic check users (45.29%)** show substantially higher churn rates than other categories.

3. Highest-Risk Combination

Customers with **month-to-month contracts + Fiber optic internet** have the highest observed churn rate at **54.61%**.

Customer Segmentation

Which types of customers are most at risk of churning?

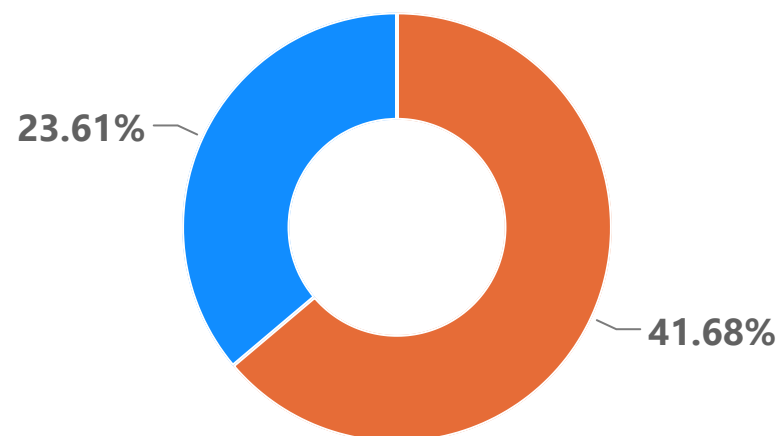

Key Takeaway

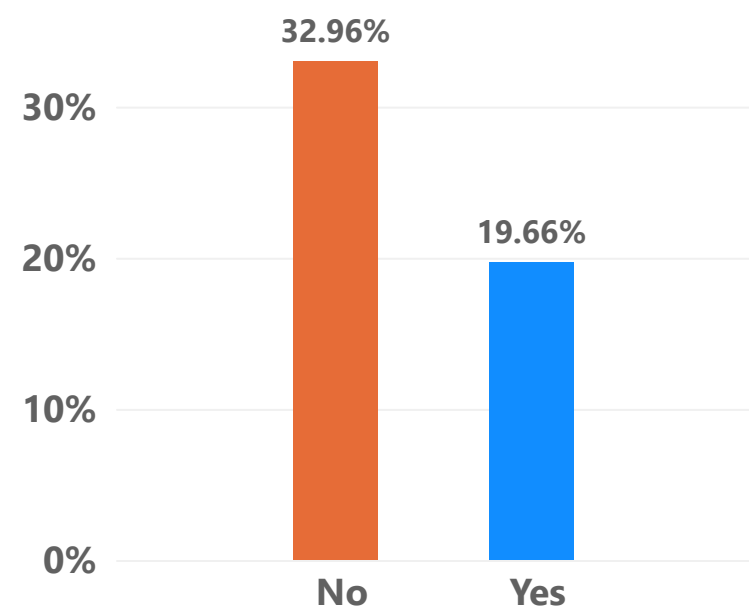

Senior citizens, customers without partners or dependents, multiple line users and higher monthly charges show higher churn rates.

Churn Rate by Senior Citizen

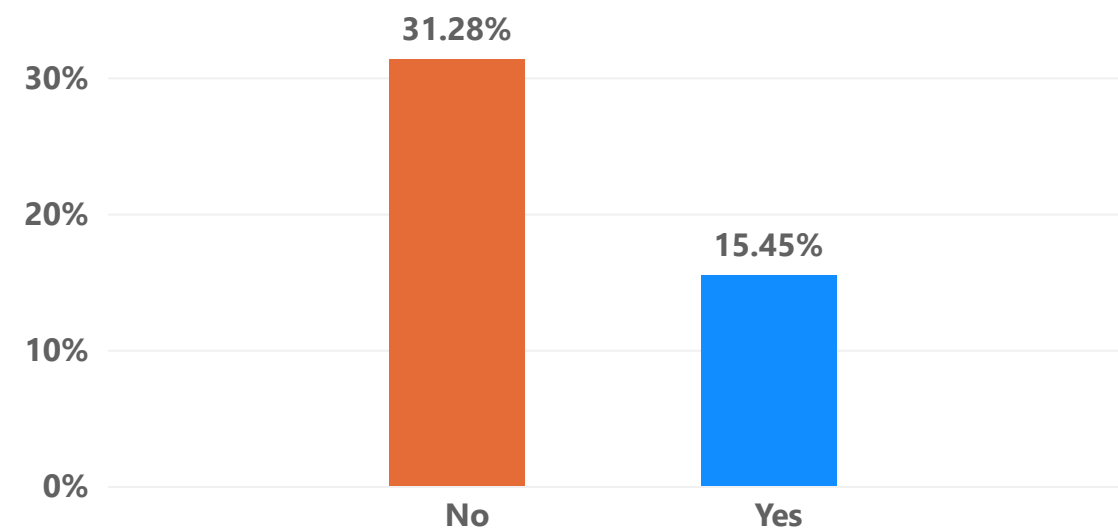

• Senior Citizen • Non-Senior Citizen

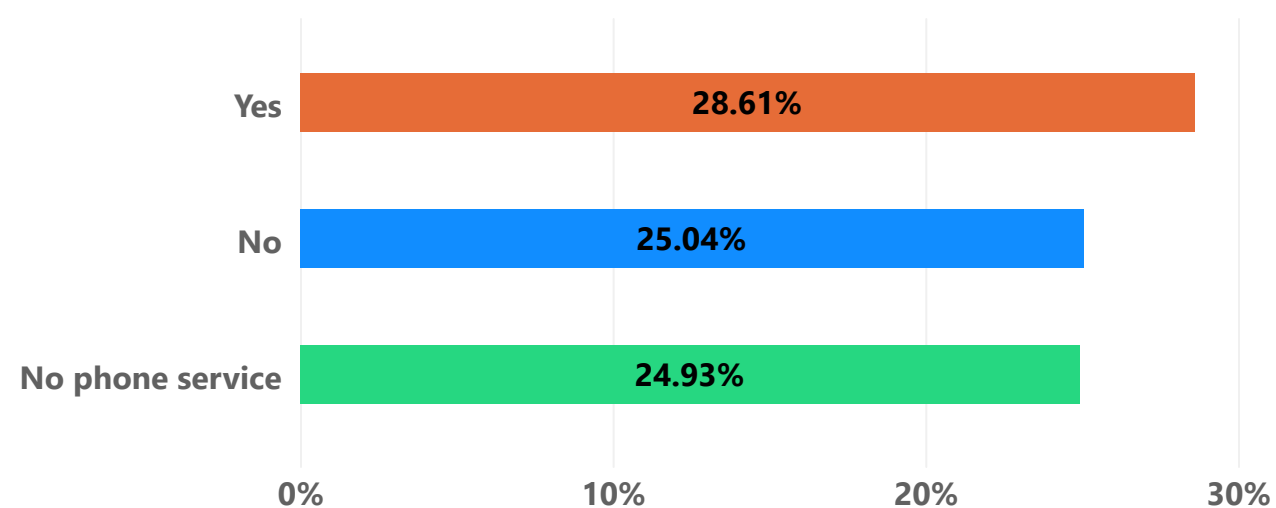

Churn Rate by Partner Status

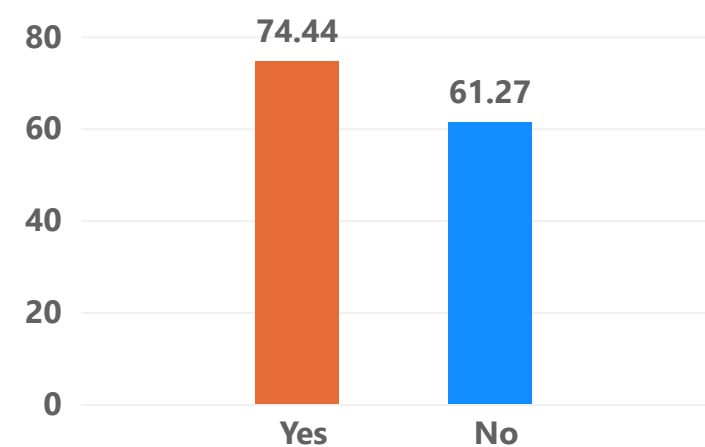

Churn Rate by Dependents

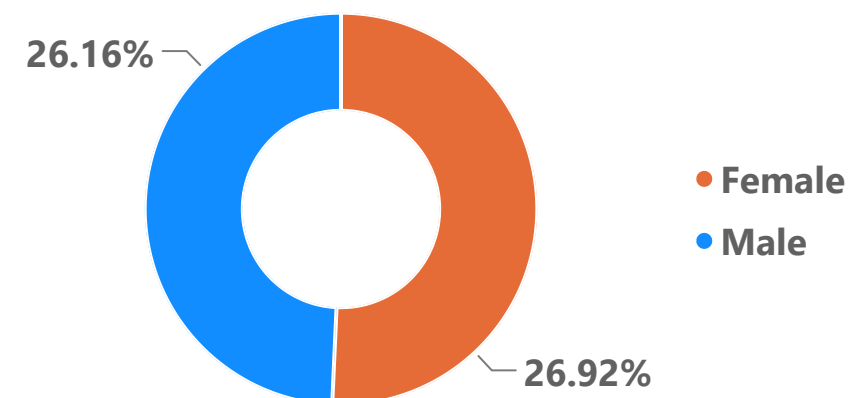

Churn Rate by Multiple Lines

Average Monthly Charges by Churn

Churn Rate by Gender

Key Insights

1. Senior Citizen Risk

Senior citizens show a **41.68% churn rate**, compared with **23.61% for non-senior customers**.

2. Household Profile

Customers **without partners (32.96%)** or **dependents (31.28%)** have noticeably higher churn rates than customers with them.

3. Charges & Service Profile

Churned customers have higher average monthly charges (**\$74.44 vs \$61.27**), while multiple-line users show slightly higher churn (**28.61%**).

Business Insights & Recommendations

What actions can help reduce customer churn and improve retention?

Key Takeaway

Churn is concentrated among month-to-month customers, higher-charge customers and customers with higher-risk service and payment combinations.

Highest-Risk Customer Profile

Month-to-month customers using **Fiber optic internet** have the highest observed churn rate at **54.61%**.

Common Risk Indicators

- Month-to-month contract
- Fiber optic internet
- Electronic check payment
- No Online Security
- No Tech Support
- Higher monthly charges

Retention Priorities

- MONITOR**
Senior citizens **41.68%** churn
- IMMEDIATE ACTION**
Month-to-month + Fiber optic **54.61%** churn
- LOW OBSERVED CHURN**
Two-year contract customers **2.83%** churn
- HIGH PRIORITY**
Electronic check users **45.29%** churn

Analyst Conclusion

Customer churn is strongly concentrated among short-term and higher-risk customer segments. Retention efforts should prioritize month-to-month customers, particularly those using Fiber optic internet and electronic check payments. Encouraging longer-term contracts, improving service support and promoting automatic payment methods can help address the segments with the highest observed churn.

Business Recommendations

Encourage Longer-Term Contracts

Offer incentives and loyalty benefits to move month-to-month customers toward one-year or two-year contracts.

Promote Automatic Payments

Encourage electronic check users to switch to automatic bank transfer or credit-card payments.

Improve Fiber Customer Experience

Investigate service quality, pricing and support issues among Fiber optic customers.

Bundle Support & Security Services

Offer Online Security and Tech Support bundles to higher-risk customers who currently lack these service.
